DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- i. In claim 1, l. 10, the phrase "...the second portion a surface..." is vague and indefinite in that besides being grammatically awkward, it appears that a term is missing.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. As best understood, claims 1, 3-6 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Nolin (US 598,387).

Nolin discloses a scythe comprising all the elements claimed including, inter alia, a first portion (at B3); a second portion (at C); and means for attachment. See whole patent.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. As best understood, Claims 2 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nolin.

Nolin discloses the invention substantially as claimed except for welded attachment. However, welded attachment means are old and well known in the art of cultivation tools and the Examiner takes Official Notice to that effect. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the method and device of Nolin with welding of the shank to the tool for the reasons stated supra.

Conclusion
